

CHALLENGE #5: IMPLEMENTATION OF HEAD TAGS

I added head tags like `<link>` to import online fonts, `<meta>` for viewport, and a `<style>` for the CSS for the next challenge as well.

The screenshot shows a code editor with a dark theme. The file is named 'index.html' and is open in a browser window titled 'challenges_demo'. The code is as follows:

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4   <title>STARRY TREK</title>
5   <link rel="icon" type="image/x-icon" href="-high-resolution-logo-black-transparent.png">
6   <link href="https://fonts.googleapis.com/css2?family=Poppins:wght@300&display=swap" rel="stylesheet">
7   <style>
8
9   </style>
10  <meta name="viewport" content="width=device-width, initial-scale=1.0">
11 </head>
12 <body>
13 <header>STARRY TREK ASTRONOMY AND SPACE EXPLORATION BLOGS</header>
14 <nav>
15   <ul>
16     <li><a href="#home">Home</a></li>
17     <li><a href="#about">About</a></li>
18     <li><a href="#services">Services</a></li>
19     <li><a href="#contact">Contact</a></li>
20   </ul>
21 </nav>
22
23 </body></html>
```

The editor's status bar at the bottom shows 'Ln 8, Col 5', 'Spaces: 2', 'UTF-8', 'CRLF', 'HTML', and 'Blackbox'. The Windows taskbar at the very bottom shows the time as 12:07 am on 07/01/2024.
